## PROJECTS

### Shortest Airline Route

- The goal of this project is to find the most efficient path between two locations on a network of interconnected airports.
- In this project, we have used Dijkstra's algorithm. It is a graph search algorithm used to find the shortest path between two nodes in a weighted graph.

### Earth Quake Prediction Using Machine Learning

- This is a machine learning model designed to forecast the intensity of earthquakes in a particular geographical area.
- This model uses Random Forest Classifier algorithm to train and test the model and gives the forecast of the intensity of the earthquake.
